

Capability Statement

Centre for Cyber Security

Research and Innovation

2021

Overview

The RMIT University Centre for Cyber Security Research and Innovation (CCSRI) has been established in 2020 within the College of Business and Law. The focus of RMIT CSRI is to develop a multi-disciplinary research centre relating to the organisational, human and technology aspects of Cyber Security.

The mission of the RMIT University Centre for Cyber Security Research and Innovation (CCSRI) is to be acknowledged as a world-class research centre in multi-disciplinary Cyber Security research and to be acknowledged by Australian and overseas industry and government as a leading source of knowledge and expertise in multi-disciplinary Cyber Security research.

Research Focus Areas

The vision of the RMIT University CCSRI is to be an internationally and nationally recognised research centre that:

- Carries out quality multi-disciplinary research relating to the organisational, human and technology aspects of Cyber Security;
- Develops and promotes understanding of strategies, policies, and law issues of the Cyber Security challenges for Australia;
- Contributes to the Cyber Security Innovation eco-system within Australia and globally;
- Actively engages with industry and government within Australia and globally.

Centre Vision

The vision of the RMIT University CCSRI is to be an internationally and nationally recognised research centre that:

- Carries out quality multi-disciplinary research relating to the organisational, human and technology aspects of Cyber Security.
- Develops and promotes understanding of strategies, policies, and law issues of the Cyber Security challenges for Australia.
- Contributes to the Cyber Security Innovation eco-system within Australia and globally.
- Actively engages with industry and government within Australia and globally.

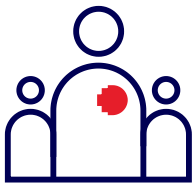

Industry Partnership

CCSRI researchers work with a diverse range of partners, both on external research projects as well as on broader engagement and impact activities. Some of our recent partners include:

- Amazon Web Services (AWS)
- E-Safety Commissioner
- Australian Information Security Association (AIDA)
- Australian Computing Society (ACS)
- Oceania Cyber Security Centre (OCSC)
- Australian Cyber Security Centre (ACSC)
- NSW Government
- Australian Women Security Network (AWSN)

Please contact CCSRI Deputy Director, [Laki Kondylas](#), if you are interested in partnering with us.
